- Git & GitHub
- Figma

## ADDITIONAL SKILLS

- Adobe Illustrator
- Adobe Photoshop
- Blender

## LANGUAGES

- English: Fluent
- Setswana: Native

## PROFILE

I am a passionate backend developer and UI designer with experience in creating user-friendly, accessible, and responsive applications. Skilled in designing intuitive interfaces using tools like Figma and implementing these designs with technologies such as HTML, CSS, and JavaScript. My expertise lies in JavaScript frameworks and libraries, particularly Node.js, with a focus on backend development.

I have hands-on experience building secure API endpoints, managing databases, implementing authentication and authorization, creating custom middleware, error handling, and automated testing (unit and integration). I also have foundational knowledge in Python and PHP.

Currently, I am deepening my backend development skills with Node.js, Express, and MongoDB. With strong design skills and a focus on delivering fast, responsive, and accessible web applications, I am eager to contribute to impactful projects that make a difference.
